

Subject: Internship at Indieship to work towards my own game studio

Dear Indieship Team,

My name is Matthias Maes, and I would like to take part in the Indieship program because I am serious about starting my own game studio.

Since my 3rd year of high school, I have wanted more than just a job in a company. At first, I dreamed of being an inventor, building machines that could solve problems or help people. Over time, that dream grew into something more creative. In my 5th year of high school, I discovered how much I enjoyed making games. From then on, my goal became clear: to start a studio where I could create and manage projects of my own. That is also when I found Digital Arts & Entertainment and chose Independent Game Production to work towards this goal.

Now in my third year, I have gained knowledge about game development, teamwork, and the importance of good project management. But I learn best by doing. Leading group projects has shown me how much I enjoy setting up pipelines, guiding a team, and improving the way we work. That is why Indieship feels like the perfect next step — a chance to go hands-on with what it really means to run a studio.

I first heard about Indieship in class, but it was during the Meet & Play event in Genk, when I spoke with Emma De Smet and Michiel Houwen from Flanders Game Hub, that I truly understood what it could offer. Indieship gives me the chance to practice not only development but also marketing, finances, and time management — all the parts of running a company that I want to experience before starting my own.

Even if the program shows me where I still need to grow, that is exactly what I am looking for. I want to challenge myself and learn as much as I can, so that when the time comes to start my studio, I am ready.

Thank you for taking the time to read my motivation letter and considering my internship at Flanders Game Hub doing Indieship. If you would like to know more about me, my skills, or my work, take a look at my portfolio at <https://mm-13.github.io/>.

Kind regards,

Matthias Maes
